

DINH QUANG THANH

FRONTEND DEVELOPER INTERN

dinhquangthanh0107@gmail.com

0906923347

Binh Thanh, Ho Chi Minh City, Viet Nam

OBJECTIVE

Final-year Software Engineering student with knowledge of both frontend and backend development. Seeking a Frontend Developer position to enhance expertise in modern web technologies, responsive design, and user experience while contributing to impactful products.

EDUCATION

Ho Chi Minh City University of Foreign Languages – Information Technology

2022- Present

Major: Software Engineer

SKILLS

English	TOEIC 735 (Listening & Reading)
Programming Languages	HTML, CSS, JavaScript, TypeScript, C#.
Core Knowledge	OOP, DSA, SOLID principles, System Design Fundamentals.
Backend & Databases	Nodejs, ExpressJs, NestJs, JWT, RESTful API, CORS , RBAC,WebSockets, Relational (MySQL), NoSQL (MongoDB).
Frontend	ReactJs, NextJs, Zustand, Ant Design, Shaden, TailwindCSS.
Tools & Cloud	Git, Github, Postman, Docker, Linux, Nginx, CI/CD (GitHub Actions).

WORK EXPERIENCE

Suri Technologies (Backend Developer Intern)

Jan 2026 - Apr 2026

- Designed and developed backend microservices to integrate a React client with Moodle core, delivering version 1.0.0 to stakeholders and driving improvements based on their feedback.
- Integrated VNPay payment gateway using database transactions and asynchronous webhooks, while simultaneously building backend services with Moodle REST APIs and custom plugins to enhance system functionality and security.
- Participated in Agile/Scrum, engaging in daily stand-ups and sprint planning to ensure consistent feature delivery and team alignment.

Technologies: Node.js, Express.js, Sequelize (ORM), MySQL, PHP (Moodle), VNPay, Cloudinary, Git.

MindX Technology School (Teaching Assistant / Instructor)

July 2025 - Present

- Taught programming and robotics to K–8 students, developing logical thinking and problem-solving skills.

PROJECTS

E-Commerce Platform - Team Size: 1 - Role: Fullstack

Sep 2025 - Jan 2026

Github: <https://github.com/quagthanh/HazHzel-Ecommerce>

Live Demo: [hazhzel.online](#)

- Developed a scalable e-commerce platform and Admin Dashboard, implementing 100+ RESTful APIs to drive a multi-attribute product engine and optimizing MongoDB schemas to reduce complex query latency.
- Automated build and deployment processes with GitHub Actions and Docker, enabling faster testing iterations and more consistent releases.
- Orchestrated an Nginx reverse proxy on an Ubuntu VPS with automated SSL/TLS.
- Secured RESTful APIs by implementing JWT authentication and strict Role-Based Access Control (RBAC).
- Integrated WebSocket real-time chat and an advanced admin dashboard, reducing support response times by 60% and increasing operational efficiency by 40%

Technologies: Next.js, React, TypeScript, Ant Design, NestJS, Node.js, MongoDB, Zustand, Axios, JWT, Cloudinary, Nodemailer.

Job Portal- Team Size: 5 - Role: Fullstack

Sep 2024 - Nov 24

Github: <https://github.com/thanhthien-git/hireforwork-app>

- Description:** Developed a job portal with role-based authentication, job posting/search, application tracking, profiles, dashboards, notifications and secure data management.
- Responsibilities:** Developed API endpoints for company, job management and built security, authentication on backend by JWT. Make a responsive dashboard and display data from backend to UI. Designed and implemented MongoDB database structure.

Technologies: ReactJs, NextJs, Golang (Gorilla), MongoDB, TypeScript, Ant Design.
